-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. In response to Applicants' arguments filed in the response filed on June 29, 2006, the substantial amendment to limitations of claim 1 has changed the scope of the claim and the Examiner has found grounds for restriction.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, 21-30, drawn to a method of collecting and storing information ... comprising "extracting from a computer system information ... and storing the system information in a computer log file", classified in class 707, subclass 100.
 - II. Claims 11-13, 15-16, 18-20, 38-39, drawn a data structure comprising " a first data field representing information about an application or service on a computer...", "a second data field ...", " a third data field ...", classified in class 707, subclass 102.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as "extracting from a computer system information ... and storing the system information in

a computer log file” and subcombination II has a separate utility such as “ a first data field representing information about an application or service on a computer...”, “a second data field ...”, “ a third data field ...”. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for group I is not required for the other group, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes is proper.

An election, with or without traverse, must be made by the Applicant in replying to this restriction requirement.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
